Glenroy
College

Bring Your Own Device (BYOD)

Dear Parent / Guardian,

Students are required to purchase their own laptop computer for use at school. The laptop must be a Windows laptop or Apple MacBook. The College does not recommend or support Google Chromebooks or tablets of any brand. If students wish to use a tablet as an additional device they may do so, but the College is not able to provide any support beyond connecting them to the College wireless network.

The College has a purchase portal set up with Edunet, our preferred supplier. All laptops purchased through Edunet meet our requirements, come with a three-year onsite warranty and are high quality, reliable devices suitable for use at school. A variety of additional options are also available through the Edunet purchase portal including bags, accidental damage cover and insurance. If you purchase a device through Edunet, it will be delivered directly to the College for you to collect. The Edunet purchase portal can be accessed at:
http://glenroycollege.technologyportal.com.au

Families can also purchase a laptop through other retailers. However, all laptops **must** meet our minimum requirements (below). Any devices that don't meet the minimum requirements are unable to be supported by the College. Please note that you do not need to purchase Microsoft Office or any security software as these are provided for free during your enrolment at the College. If you purchase a laptop through another retailer, please bring it to the College IT Department to have the College software installed and the laptop connected to the College wireless network.

Windows		Apple MacBook	
Minimum Spec:		**Minimum Spec:**	
Processor	Intel N100 or AMD A6	Processor	Intel Core i3 or Apple M1
